

I am opposed to the expansion of Low Power FM bands because they will have the opportunity to displace translator services, which provide valuable informational and entertainment benefits to the general public.

I currently support both K-Love Radio Network (FM 89.9) and the Air One Radio Network (FM 95.3) financially to ensure that Central Kentucky listeners of all ages have the option of commercial-free music and morally-responsible messages.

I work every day with high school students, and have seen first-hand the positive impact that "clean" music and commentary have on their attitudes and behaviors. I would hate to see this "safe haven" taken away from our children, as there are so few safe places left on the television and radio airwaves. I personally listen to both stations every day because I want music, news and commentary that is morally sound and uplifting.

Please consider the positive impact Christian Radio has on a community --- it promotes responsible citizenship, generosity, compassion, and service to others --- to all of its listeners, young and old. It would be a terrible thing to lose its broad influence in our communities!
